

Our experience with historic structures and facades may surprise you. Some of the projects we have worked on, both as a prime and as part of a knowledgeable design team, include:

- ◆ Thomas Jefferson's Poplar Forest (Bedford County, VA) - 1806
- ◆ Blair House-President's Guest House (Washington, D.C.) - 1824
- ◆ Isaac Bell House (Newport, RI) - 1884
- ◆ Hackett Middle School (Albany, NY) - 1925
- ◆ Albany City Hall (Albany, NY) - 1927
- ◆ Wallkill Correctional Facility (Wallkill, NY) - 1932

The list is extensive. We would like to help you with your next historic structure or facade project. Please call us at (315) 446-9201 or browse our web site at www.khhpc.com.

We Love

Historic Buildings

... and we specialize in restoring them.

At KHH, we have a passion for older buildings and historic structures. These are the edifices that have withstood the ravages of time, many of them painstakingly designed by noted architects of the period, all of them serving important functions in their communities. They have been patched here, and pointed there, and are now in need of rescue from well-intended but often detrimental repairs and from wear by usage and the elements.

We have decades of experience in this type of remediation, including structure, roofing and facades. Our firm has hands-on knowledge of the materials used in old and historic building construction, including

Colgate University Alumni Hall, 1859

Old Onondaga County Court House, 1906

wood, masonry, mortars, structural clay tile, concrete and steel. Our roof experience includes copper, clay tile, domes and thatch.

Klepper, Hahn & Hyatt approaches each of these projects with an awareness of its architectural and historic significance. Our personnel are highly experienced in the evaluation, design and construction administration of historic structures, wall assemblies and roof assemblies. We are meticulous in our studies of the structure and analysis of materials and their applications. Our relationships with other experts, including petrographers, enhance our understanding of the materials and their history.

We conduct comprehensive building reviews, and provide thorough reports, including cost

The Niagara Mohawk Building, 1932

estimates for the repair work we recommend. For the owner and/or client, we provide recommendations that are as economical as possible, but remain sensitive to the original construction style of the building. For facade restorations, we salvage the maximum amount of existing materials to maintain the authentic integrity of the building.
